

## ***POUND THE PAVEMENT...!***

It has been talked about for years...now we need to address the situation! We need to resurface the top end of the race track. In short order here are some of the facts:

- From the finish line to the second shutdown turnoff it is 2000 ft.
- This area is still covered with the original asphalt from 1966.
- Over the years crack filling and patching has taken place.
- This year we suffered major surface breakdown in two spots.
- The "bump" in the right lane is becoming unmanageable.
- As the need for speed has increased over the years so has the need to brake, this takes its toll on the top end.
- The costs to repair continue to escalate each year that this is postponed.
- In 1995 the cost to resurface the racing area cost \$110,000.00.
- If not addressed we will be forced to reduce our track to 1/8th mile; however, we will still have to resurface at least 800 ft. of the top end.

By the numbers here is what we are looking at:

The cost to Mill, Prep and Pave 2000 ft. is \$319,341.60 plus GST = **\$335,308.68**

We need a contingency of **\$20,000.00** to cover possible ground work extras

**Grand total required = \$355,308.68** ...lets round it down to **\$355,000.00**

We have set **April 20th, 2013** to attain our goal

Wow now that looks like a daunting task, but like someone once told me...

***"Everyone can eat an Elephant...One bite at a time"***

So try to look at it this way....For \$175.00 you can sponsor 1ft of asphalt, for \$1750.00 you get 10ft. All of a sudden it takes a whole lot less to achieve our goal.... one bite at a time.

I know we had a tough year and it always seems like we have our hand out, but each and every one of us must recognize that we are a member owned track and as such we need to work on creative ways to pay for our facility upgrades.

**Consider this as I ask all of you to work on raising these funds...**

**What do you want to leave as your legacy...**

Regards,  
Tom Firth  
SDRA President
